1 Comments: [ ] We highly oppose the Yucca Mountain Project, because the waste has to travel so close to our property and so close to the town in general with property values plummeting. The government talks about how safe it is to store this waste but look what happened in Hartford, Washington at their nuclear plant. Can you honestly tell us that you would want this kind of waste traveling through your backyard and beeing stored in your state without a 1000% guarantee that no leaks will occur like the one that happened in Washington? [ ]

Papermail: 1690 Palomino Dr. Henderson, NV 89015
